

# Strategic plan on EV charging in Växjö

## Deliverable 4.6.2

- Meeting the growing interest of EV
- Defining locations for charging
- Defining strategies for Växjö

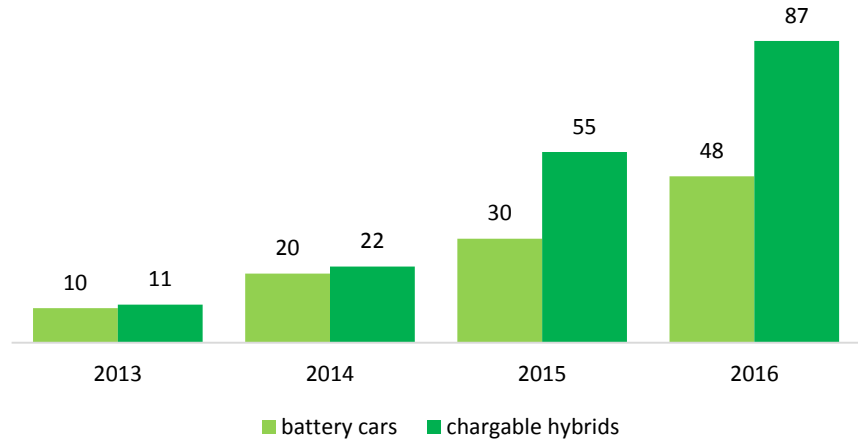

# Current status

- Nearly 60 public charging points
- Different ownership
- Different standards

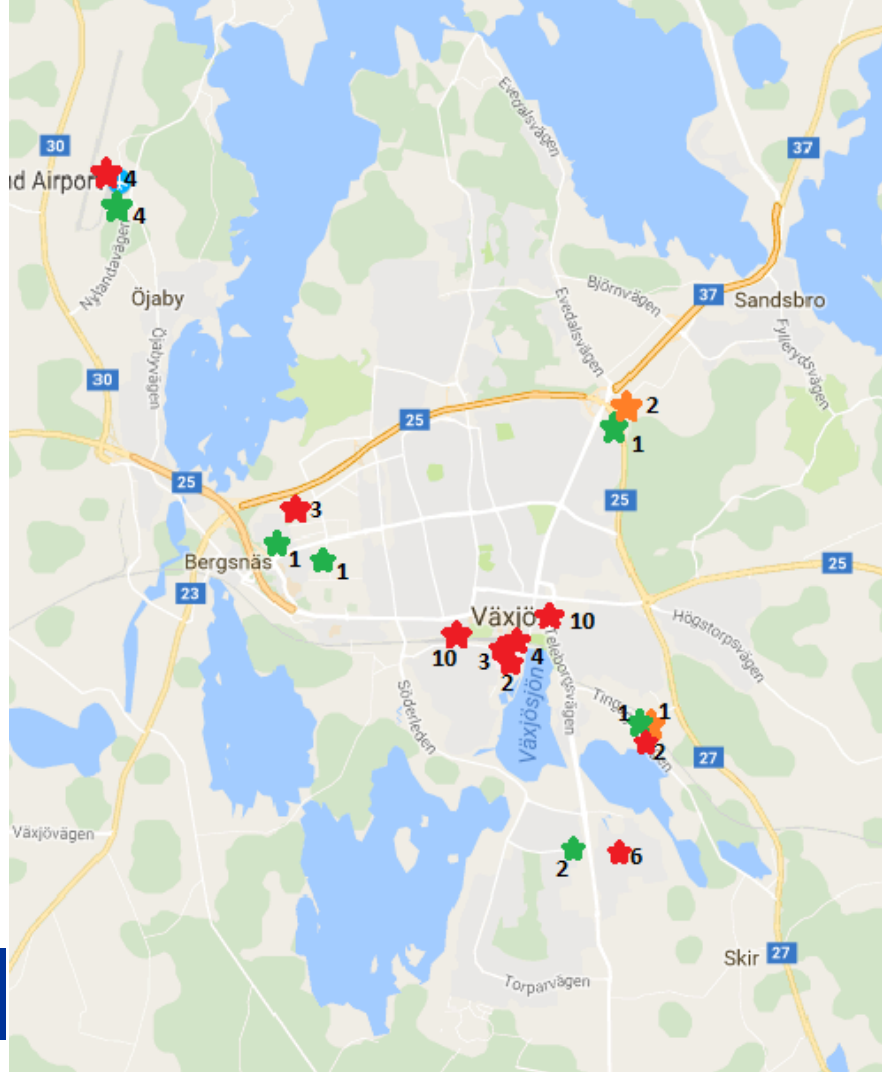

# Current status of cars, December 31st, 2016

# Public chargers, May 2017

- 10 slow (green)
- 44 semi (red)
- 3 fast (orange)

# Important aspects

- What solution is needed where?
- Who should be the owner?
- Payment or free of charge?
- Responsibilities

## Progress so far

- Bench-marking with other cities
- Scan of the municipal needs
- Business case for EV charging
- Start writing the plan

# Draft/final version in summer?

- The deliverable is delayed
- No need for political decision
- Has no negative impact on other elements of Ready
- Gives more time to agree on policies
